

SAP BUSINESS INTELLIGENCE · SINCE 2002

Gergely Justh.

Freelance SAP BI Architect & Senior Consultant

Data warehouses that answer real business questions, not just store data. I design, build and modernize SAP BI landscapes for Europe's leading enterprises — as an architect who understands your processes as well as your data.

PROFILE

SAP BI consultant since 2002, working across Europe — from Basel and Munich to Vienna, Frankfurt, Helsinki and Budapest. My focus is Business Intelligence: SAP BW and BW/4HANA, on HANA, integrated planning, and BusinessObjects — backend, frontend, planning and project leadership in one hand. I have led projects with both waterfall and Agile methodology, managed budgets in the hundreds of thousands, and built everything from GxP-relevant generic extractors to group-wide planning applications used in 100+ countries. Native Hungarian; fluent in English and German, including full project delivery in German-speaking environments.

WORKING LANGUAGES

SKILLSET

Project Management

Leading large BI projects with waterfall and Agile methodology.

Agile · Waterfall · Test management

BI Data Modeling

Small-scale to multinational, multi-layer data models on HANA.

HANA calc views · aDSO · CompositeProvider

Programming

Above-average depth in ABAP, SQL and AMDP — routines, programs, user exits, everything.

ABAP · SQL · AMDP

Data Extraction

Standard, custom-developed and third-party extraction, incl. GxP environments.

ODP · SLT · OData · Generic extractors

BI Frontend

Reporting frontends from classic BEx to modern dashboarding.

Analysis for Office · QlikSense · Web Dynpro

Planning

BI-IP, BW-BPS, and BPC across finance, controlling and operations.

FOX · BI-IP · BPC

BusinessObjects

The complete BO platform, from universes to executive dashboards.

BICS · WEBI · Xcelsius

Migrations & Upgrades

Release upgrades, BW/4HANA conversions and the path to S/4HANA, BDC, DataSphere.

BW/4HANA · S/4HANA · DataSphere

Authorizations

Analysis authorization concepts up to a custom multi-dimension cockpit.

Analysis auth · RSEADMIN · Custom cockpit

RECENT PROJECT EXPERIENCE

2023 – present · Architect · S/4HANA · BDC · DataSphere · Munich

Sandoz

Evaluating business requirements across the BI landscape and shaping solutions with an integrated architectural approach; aligning and steering several parallel migration projects — the move to S/4HANA, the upgrade to SAP Business Data Cloud (BDC) and the preparation of the DataSphere reimplementation.

2020 – 2023 · Senior BI Developer · Team Lead · BW/4HANA · Munich

Sandoz

Building the backbone of a QlikSense-based dashboarding solution covering every aspect of reporting needs — combining speed with ease of use and leading the team with an agile approach across several sprints.

2022 – 2026 · Senior BI Developer · BW/4HANA · Bad Vilbel

Stada

Rebuilding an integrated-planning-based tool calculating the performance fee charged towards licensors: with HANA views and AMDP code I achieved an 80% performance gain in allocations and vastly increased stability. Also improved the ICP tool for intercompany price calculation chains.

2021 · BI Developer · BW/4HANA · US

General Electric

Support of the existing BI solution and preparing the move to HANA by modernizing the architecture — streamlining redundant data flows and laying out a clean, low-risk migration path.

2020 · BI Developer · BW/4HANA · Finland

Palkeet

Migrating an existing BI implementation to BW/4HANA by rebuilding the entire data flow with LSA++ layered aDSOs and CompositeProviders — leaner models, faster loads and a landscape ready for the next decade.

2017 – 2019 · Project Manager · 400k CHF · Basel

Novartis

Creating automated interfaces to precalculate and transfer data from SAP BI to a native iOS application via an intermediate MSBI layer, displaying critical KPIs on any iOS mobile device.

2018 – 2020 · Test Manager / Developer · BI 7.5 · Munich

Essity

Achieving retail execution excellence with a SAP BI-based custom application scoring stores on compliance with sales policies and KPIs such as shelf life and product placement — the right product, in stock, at the right price, across the country.

2017 – 2018 · BI Developer · BI 7.3 · Munich

Sandoz

A BI application with QlikView frontend displaying daily sales KPIs — MTD actuals and linear/PY-based calculated MTG with special phasing logic, including variances — in daily use by C-level executives.

2015 – 2016 · BI / BO Developer · BI 7.3 · Basel

Novartis

A tool used by 100+ countries worldwide for entering and consolidating product margin data in SAP BI and Web Dynpro, plus a master data management tool for maintaining hierarchies and attributes across several systems.

2014 – 2015 · BI / BO Developer · BI 7.3 · Basel

Novartis

Migrating all consolidated financial reporting from the divisional data warehouses of all Novartis divisions to a single group data warehouse — with all closing-relevant consolidation tasks, division-specific and cross-divisional.

EARLIER EXPERIENCE – 2002–2014

2010 – 2014 **Sandoz** · Munich — Xcelsius dashboards with full financial scope from SAP BI; BO Crystal Reports & LiveOffice; BI-IP molecule launch planning & tracking.

2010 **Norilsk Nickel** · Harjavalta, FI — BI across PP, PS, IM, FI and CO with custom generic extractors and a BI–Cognos frontend — one template covering five modules.

2009 **Fővárosi Vízművek** · Budapest — Function-identical BW 3.1 → BI 7.0 upgrade without disruption to reporting; CO area switched to new loading structures, fully documented.

2009 **Cora** · Budapest — BI extension with FI, CO and EC-PCA — data modeling, process chains and queries delivered end to end.

2009 **Infraserv Höchst** · Frankfurt — BI-IP operating and material planning with input-ready queries, complex WAD web screens and FOX / user-exit functions.

2008 – 2009 **Neckermann.de** · Frankfurt — Assortment (MAP) and sales planning — input-ready queries and WAD web screens (with JavaScript) integrated with strategic and P&L planning.

2006 – 2008 **Generali** · Vienna — Enterprise-wide insurance planning (BW-BPS): controlling, BS & P&L, actuary, financial assets, liquidity, HGB–IFRS; VBA layouts and flow to BCS.

2005 – 2006 **Coop Hungary** · Budapest — Flat-file interfaces with a dynamic ABAP upload program and check routines; process chains, monitoring exports, field-level auth, VBA workbooks.

2004 – 2005 **Areva / Framatome** · Erlangen — SEM-BPS central and sector cost-center planning, investments, balance sheet, P&L, cash flow and HGB–French GAAP reconciliation.

2003 **Antenna Hungária** · Budapest — SEM-BPS for cost, income, portfolio, P&L, balance sheet, cash-flow, financial, stock and asset planning — one integrated model.

2002 – 2003 **Ferrero** · Budapest — FI-CO: implementation of new company codes and CO customization, delivered alongside running business without impact on period-end closing.

2002 – 2003 **Nitrogénművek** · Pétf, HU — BW, SEM-BPS and SEM-CPM across FI, CO, CO-PA, PP, PM, QM and MM business content (with custom enhancements).

2002 **Antenna Hungária** · Budapest — First BW implementation — GL, assets, AP/AR, turnover, budget, FI-SL and HR; foundation for the follow-up planning project.
